

Cummins Sales and Service - Renton WA

Mitigation plan goals and overarching principles

As the Marine Business Director for Cummins Sales and Service (a 100% Cummins Inc. company) based in Renton WA we have been already working with high probability marine customers in plans for repower utilizing the grant funds. Cummins has a long and established business repowering with emission improvements over the last 10 years. We have established products, tools and processes to insure proper repowering with focus on proper product and emissions compliance. We welcome the opportunity to work with the Dept of Ecology in meeting objectives. Regards
Geoff Conrad

General comments

As the Marine Business Director for Cummins Sales and Service (a Cummins Inc. company) we have a long and successful history in repowering hundreds of marine vessels in NW / AK. We have a full line of products, tools and processes to help marine customers navigate their repower solutions. Since 2000 we have help customer determine their best way to improve diesel emissions in their vessels with EPA certified products. We look forward to working with both targeted marine vessel owners and the Dept of Ecology in the most effect use of VW funds.
