

South Bend School District

Mitigation plan goals and overarching principles

I believe it would be an excellent idea to divide out a portion of school bus funding into every school district state wide. This money could be put into school district TVF funds towards the purchase of new busses.

This will help

- Maximize air quality co-benefits beyond NOx reductions.
- Maximize public health benefits.

Thanks,
Wyatt Kuiken

Priorities

By putting money into the schools TVF funds we will be able to

- Accelerate fleet turnover to the cleanest engines.
- Ensure cost-effectiveness
- Leverage additional matching funds
