Priorities

This is a great list of priorities. I am particularly in favor of replacing our diesel ferries with electric ones. Please also consider adding better infrastructure for bicyclists (e.g. protected bike lanes and other safety measures) to encourage this clean form of transportation.

Mitigation fund allocations

Please consider allocating funding to support and encourage alternative transportation (e.g. increase bus and light rail use, safer bike lanes, free bike repair stations and secure, covered bike parking areas).

Disproportionately impacted communities

Thank you for considering these often overlooked communities.
