

Barbara Menne

Mitigation plan goals and overarching principles

I support these goals, particularly to address disproportionately disadvantaged communities.

Priorities

I particularly support priorities placed on electrification of public transportation fleets, such as buses and ferries/tugs. That means moving directly to the cleanest engines (electric), not just partial/transitional improvements in engines or fuel.

Mitigation fund allocations

While I personally would like to see more charging stations for personal EV's, I believe these funds should be focused instead on promoting improvements in the public sector such as On-Road Heavy Duty Vehicles and Marine Vessels where there is less incentive for businesses and individuals to provide the funds.

Disproportionately impacted communities

I strongly support this principle and priority!

General comments

Thank you for all the work and thoughtful consideration that has gone into this document.
