

Alaska Logistics

Alaska Logistics LLC appreciates that we are able to comment on the 112.7M VW Settlement fund. Alaska Logistics, LLC is a marine transportation company and we own four vessels that cater to delivering freight from Seattle, Washington to various locations in Western Alaska.

We would be interested in investing a portion of the allotted funds to upgrade our Cummins diesel engines on our tugboat the Fish Hawk in the offseason of 2017/18. We will be upgrading our EPA rating on the engines from a Tier 0 to Tier 1, making our fleet more fuel efficient and environmentally friendly while operating in the waters off of Washington.

Alaska Logistics would look forward to any of the allocation assistance in funding to repower one or possibly more of our tugs and landing crafts from the VW funds settlement. If allocated, these funds would allow Alaska Logistics LLC to reduce the environmental impact of its operations, including compliance with the Diesel Emission Reduction Act (DERA).

Thank you for any further information on the status of the proposed Volkswagen (VW) mitigation plan.

Sincerely,

Alaska Logistics LLC.
