

Advocates for a Cleaner Tacoma

Dear Ecology-

Given that the public hearing was only held on July 17, 2018, we respectfully request a one month extension to the public comment period.

Our main concern relating to this project deals with the lack of cumulative air quality monitoring in and around the port of Tacoma. Given the expected increases in the variety toxic pollutants, having no cumulative air quality monitoring makes it impossible to understand if, by adding this project, the citizens of Tacoma will be exposed to overall hazardous levels of toxic pollutants.

Sincerely,

Todd Hay, President

Advocates for a Cleaner Tacoma (ACT)
