Shingo Yamazaki,

Thank you for the opportunity to review and comment on the Tacoma WestRock Steam Limit Project Notice of Construction.

Rather than repeat everything Citizens for a Healthy Bay and others have said, I am going to urge Ecology to reconsider allowing WestRock to increase the amount of air pollution by any amount. People who live in Pierce County already have increased disease and reduced life expectancy compared to residents in many other parts of the state.

<https://q13fox.com/2017/05/09/your-life-expectancy-in-washington-county-by-county/>

I've also included a beautiful illustration of reduced life expectancy globally due to air pollution:

https://www.washingtonpost.com/graphics/2018/national/health-science/lost-years/?noredirect=on&utm_term=.5e271c885c04

I have asthma and struggle with it when air quality is poor. I also own four homes in the city and care what happens to my tenants. Thank you for considering my comments.
