

## Nicholas Magruder

- Ecology must account properly for all WestRock greenhouse gas emissions. They must use most up-to-date science and include life cycle harm from WestRock's climate harming gases.
- Allowing more greenhouse gas emissions violates Port and City climate policies.
- Ecology is still not considering cumulative emissions from air toxins or greenhouse gases. ...
- WestRock needs to fully mitigate for all consequences from toxins and greenhouse gases.
- We are asking for a Cumulative Health Impact Study before issuing permits.
