

Mare Wahosi

We can no longer continue to conduct business as usual. The planet, the future of our children, our grandchildren, and the continuation of humanity depends on the decisions we make today. We must stop polluting our environment, we have to stop putting CO₂ in our atmosphere, these aren't suggestions these are facts. It is all of our responsibility to do our utmost to save our planet. The Tacoma community and the people of Washington are relying on you to do the right thing and deny this increase and send a message that we will protect our communities and our future by moving toward safer alternative energy.
