

## LV Cleanup Scoping (4/3/2018)

F - 1) Addressing concerns about more and more stringent cleanup levels and the frequent problem of: a) science not being able to quantify to those extremely low levels; and b) providing cleanup criteria that are nearly impossible to meet.

2) Regarding vapor intrusion screening criteria and addressing/incorporating, or at least providing for consideration of , WISHA/OSHA worker exposure criteria as guiding ARARs.
