

LV Cleanup Scoping (4/3/2018)

F - I was confused by the development of Stds in WAC 173-303. I haven't checked the most recent version, but need to understand, link to MTCA, such as if >Method A, goes to Subtitle D landfill? Also, listed waste (again 173-303) decisions will thwart cleanups at dry cleaners when it is not usually clearly known that the waste (PCE or TCE) is 'discarded' or 'spent'. Some site managers are assuming any solvent is always a listed hazardous waste at ANY detected level, even BELOW MTCA cleanup levels or J.flagged values.
