**Subject:** Phytoremediation for Maury Island open space cleanup site  
**Date:** Monday, April 16, 2018 10:23:16 AM

---

I was unable to attend the Vashon meeting recently but a friend who did, informed me that he did not hear phytoremediation discussed. I believe that sword ferns as well as other plants are capable of removing contamination from soil. Are you considering the role that plants could play in the cleanup? Thank you, Saphire Blue.
