Re: Reynolds Metals Aluminum Smelter Cleanup

Dear Mr. Schriever:

Thank you for allowing me to comment on the most recent changes to the draft Cleanup Action Plan and draft Consent Decree for the Reynolds Metals Cleanup.

The Department of Ecology is to be commended for all your work getting us to this point where there can finally be a completed cleanup for this site. The Yakama Nation must also be applauded for their persistence in assuring that fish and other aquatic species are protected now and in the future.

Please proceed in finalizing this process and holding Alcoa and Millennium accountable for the cleanup.

Best to you,

Sandra Davis
Longview, WA
