**Subject:** Public hearings needed on Bellingham central waterfront

Ms. McInerney,

As a concerned citizen of Bellingham who has watched the evolution of the Bellingham waterfront since 1976, I urge DOE to hold at least two hearings on the plans for the Cleanup Action Plan for the Bellingham Central Waterfront. These hearings are needed to gather additional public input in a public forum regarding the effect of the Plan on adjacent areas affected by the plan, the need to explore the public's understanding of the decisions DOE made regarding the extent of the proposed cleanup and for candidates for municipal office who survive the Primary election to learn about more about these actions and their effect on the future of the waterfront.

Thank you for your consideration,

Daniel A. Raas
