

Pierce County LEPC

- Include "non-floating oil" in the definitions section of Chapter 173-182 WAC.
- Require that the one-hour initial assessment should be performed on-site, at the location of the spill.
- Add greater detail and specifics on the on the amounts and types of resources and equipment needed to respond to a worst-case spill of non-floating oils.
- Shorten timelines for deploying additional personnel to within the first few hours of an oil spill, with particular emphasis for non-floating oils.
- Increase planning standards for wildlife response to include adding provisions for immediate initiation of wildlife response actions with adequate personnel and equipment; with a focus on deterrence actions that keep wildlife from entering the scene of the spill.
