

## Paul Kressin

- 1) Please review and assess the likelihood of environmental damage due to past practices of the smelter company.
- 2) Rate the damage due to underground water pollution, surface water pollution, traffic congestion, (assuming no infrastructure upgrade as none is planned at this time, on idaho-41 and Idaho and Washington-2.
- 3) Describe and rate damage from exhaust plume from burning coal from the plant.
- 4) Assess and rate the increased impact of solid waste generated from the plant and the increase in population required to run the plant. Include incidental employment including railroad workers and secondary and tertiary business in the area.

Thank you for your time and the effort necessary to do this EIA.
