

Tonja Lynch

We have lived in the Sagle area for many years. We love the clean air, nature and beautiful wildlife. Our family appreciates the rural beauty and pristine mountains, lakes, rivers here. We love being out in nature and raising our family with these same ideals.

We were very disappointed in learning that Washington was planning on ruining our beautiful N Idaho and NE Washington regions with the pollution of a smelter. N Idaho especially depends on tourism; this smelter has the potential to be devastating to our amazing environment.

We urge you to rethink the location of this smelter. We DO NOT WANT IT HERE! We want to raise our grandchildren in the same beauty we raised our children in.
