

Liam Fitzgerald

Dear Mr. Pfeifer,

I am strongly opposed to the idea of allowing a silicon smelter to be located in Newport Washington. This type of industrial activity is not compatible with the pristine environment of this part of the Inland Northwest. As I and my family live downwind of the proposed smelter site, I am deeply concerned that pollution from the smelter would have an adverse affect on air quality, which in turn would affect my family's health, and our quality of life.

Liam Fitzgerald
