

## Wendy Beach

Why is Governor Inslee allowing a Canadian company to build a toxic silicone smelter on the Eastern side of the state? Why is he allowing the people of the state he represents to struggle over a Canadian company wanting to come take over our part of the state, including Idaho? Why doesn't he allow this facility in his own back yard of Seattle where it belongs? Why will he not put an end to the chaos it is causing? What is in it for him? Greed?
