

## Barb Crumpacker

I am very opposed to the Newport smelter. As an asthmatic, this could be a death sentence. It's bad enough we have to endure & wear masks, due to wildfires around the west. And grass burning on the rez. Please don't approve this insult to our air quality. It's not like all 44,000 Coeur D'Alene residents can, or should have to, move away to avoid this stuff. Thank you for caring more about people than you do possible financial issues.
