

Alice Kersey

My husband and myself both have respiratory issues now. (broncthectesis and pulmonary fibrosis. We live at 5051 Old Priest Road, Oldtown ID and we spend 6 months of the year in Idaho and the rest of the year in Florida. With prevailing winds coming from the west, we are going to breathe whatever is in the air coming our way. I believe any business should be able to operate and every regulation-abiding business should be able to stay in business. Extensive environmental testing should take place prior to operation and routinely after testing. If there is no significant change, let the business operate, but testing needs to be done in both Washington and Idaho.
