

Suzanne Duntley

I do not want a HiTest Silicon Smelter Processing Facility in my back yard. The proposed site in Washington is on our Idaho boarder. I strongly oppose it. It will negatively impact my quality of life. I recently moved from Southern California to Northern Idaho due to a respiratory condition seeking clean water and air. If this project moves forward, at 65 years of age, I will be forced to move. This was suppose to be my forever home.

I am casting my vote against this business. My answer is NO!
