

Michae Boyer

In my 20 plus years of living in Bonner County, as well as a lifetime of living in north Idaho this is a first for job creation. I've watched spotted owl propaganda kill timber, environmentalists ruin the Bluegrass farmers. We saw the mineral deposits lay untapped , jobs lost due to political opinions , opinions spurred by outside influence. Now we eat smoke every year, supplied by our poor forest management practices , foresters hog tied by opinions with political clout. Let's stop the bull. Our schools need tax dollars, our residence citizens need jobs, supplied by the revenue from taxable wages. Our children and seniors are being arrested for using or manufacturing meth. Does this bother anybody? This is why we need jobs ! Bonner County needs money to achieve a little self respect , respect that will bring a New Ford dealership to Newport. Make Newport Great again! That sounds trendy but it's not, it's a desprit cry of an addicted single mother. Your children. Thanks.
