

Michael Naylor

- 1.The majority of the residents and businesses in the region have metal roofs on them. How is PacWest going to mitigate the damage to them caused by their emmissions?
- 2.There are a number of wet lands in close proximity. Will the emmissions cause damage to Turtle shells?
- 3.There are a number of Eagle's Nests in close proximity. How will PacWest deal with the damage caused to their breeding cycle?
- 4.We raise horses. How is PacWest going to mitigate the Veterinarian costs associate with the particulate matter cause by their opporation in our horses. Such as in the case of bean increases. <https://thehorse.com/151522/male-horse-hygiene/>
- 5.The acid rain created by PacWest will damage the paint on vehicles, equipment, boats, homes, businesses, signage. How will PacWest mitigate this damage?
