

Carol James

My husband and i moved to newport to retire, i have health issues, like asthma, and have to take medications for it.

I dont need a smelter in our little town to pollute my clean air, that is why we moved here, not only the beauty of the trees, and living on the pend orielle river,

That smelter will affect everything that we are enjoying now, please dont take all these wonderful things away from us,

Thank you

Carol james
