

## Christine Fritz

I am writing this letter to oppose the Newport PacWest Silicon Smelter because of the detrimental effect it will have on our population. Studies have shown the harmful effects this type of air pollution has on a person's cardiovascular, pulmonary and overall health. We do not need to increase our health care costs anymore than they already are not to mention the loss of quality of life. Eastern Washington and Northern Idaho have one of the best air quality around, Please lets keep it that way.

Sincerely,  
Christine Fritz RN, MSN
