

## Larry Johnson

Yet again another Jayson Tymko whopper of a lie. When it was brought up that there is no fire or medical coverage in the area of the proposed smelter Mr. Tymko stated that he had talked to the local fire chiefs and they said there was no problem providing coverage. As a fire commissioner I can tell you that the statement is absolutely false. First of all no fire chief would say such a thing because there is a clearly defined legal process that must be followed and it would have to be approved by their board of commissioners. Also it was easy to verify that Mr. Tymko did not speak to any fire chiefs in south county. They deny any such conversation took place. There is and should be absolutely no trust in this company, their managers or anything they say they are going to do.
