

Elise Boyce

I am opposed to this smelter project as there are already huge concerns of the significant environmental impact it will have. I value health and our home. I know that as a community member of Sandpoint my voice shakes and represents 100s of others in my community. Many people of Sandpoint have moved here for reasons of health and appreciation of nature. They want to simply breathe and live. No job or project is ever worth the risk of our own health and our home. Please consider the bigger picture before we are in a major crises!

Elise and many other carers of Sandpoint
