

## LeAnne Tope

I am very concerned about impacts on Priest Lake. Myself and others want no impact to the water quality of the lake, no impact on the surrounding forest and waterways, and the wild life. I'm very concerned about particulates in the air, acidity of the air and find any impact whatsoever on the Priest Lake area to be unacceptable. We don't want impacts that are within guidelines and deemed acceptable impacts. This area needs to be preserved as it is now.
