

Laura Rantala

As a 40 year resident of the Priest River/Sandpoint area, I often praise the air and water quality. The following quote is reason for concern. "The pollutants fit into four categories, including criteria pollutants, hazardous air pollutants, toxic air pollutants and greenhouse gasses(GHGs)" What are the long term health effects of exposure to these toxic pollutants?

This site will provide a limited number of jobs but with potential for long term degradation of the environment.

What industrial waste will be produced and how will it be disposed of?

What is the potential for the contamination of the ground water?

Why? Vote 'No'
