

Jim Jackson

Will this process be fair or is the DOE getting a kickback or a bribe, "usually defined as the giving or receiving of a "thing of value" to corruptly influence the actions of another, most commonly to influence a contract award"? (<https://guide.iacrc.org/potential-scheme-bribes-and-kickbacks/>) I believe the DOE's mission statement asserts that they will PROTECT the people and environment. I sincerely hope they intend to honor that promise.
