

## Mark Hall Real Estate

We do not need a smelter in our community. As a real estate business we see many of our clients come to this area for it's unpolluted air, soil, water and wildlife. More and more people are becoming aware of how important clean air and water is to our health and the health of future generations. We need to be good stewards of the land and natural environment. Please take this into consideration that not only is the health of the people and animals in our community in jeopardy but also the presence of a smelter could hurt the economy in the long run.
