

Judy Fredrickson

I attended the Scoping Meeting in Newport, WA. Thank you for coming and I truly hope the Dept of Ecology listened and will act on the comments that were made at that meeting. I want to go on record as agreeing with all the scientific comments that were made in that meeting that gave reasons why we should not have the smelter in Newport. Proximity to town, air quality, increase in truck and train traffic, toxic elements going into the air and water, that we are a high inversion area which puts our inhabitants at higher risk from 'dirty air'.

Thank you for listening
