

Michael Naylor

How did this letter sent to Scott Pruitt at the EPA from County Commissioners in Idaho effect the HiTest PacWest project? Bonner County Commissioner Jeff Connelly happens to sit on the HiTest now PacWest executive committee. Do the Citizens need to be concerned that HiTest now PacWest is interfering, corrupting and influencing our local officials in order to gain favor at the expense of the public?

The Honorable Scott Pruitt
Administrator
United States Environmental Protection Agency
Mail Code 1101A

Washington, DC 20460

RE: Kalispel Tribe of Indians request to re-designate the Kalispel Reservation to be a Class I air quality area under the Clean Air Act's prevention of significant deterioration program

Dear Administrator Pruitt:

It has just come to the attention of Boundary, Bonner, Kootenai, Shoshone and Benewah Counties in Idaho, that the Kalispel Tribe has applied to re-designate their reservation to a Class I air quality area under the Clean Air Act.

We have significant concerns regarding this application as it has effects well beyond the boundary of the reservation.

1. None of the aforementioned counties received any notification of this action.
2. There are significant concerns regarding the impacts to development in our communities
3. What is the science that suggests this is necessary?
4. What is the economic effect to our counties?

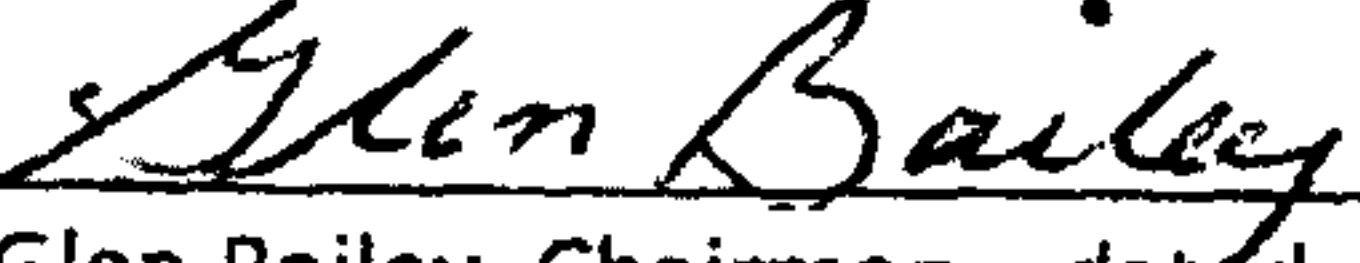

The chairmen of the respective counties, with full authority of their boards, respectfully request that this process be stopped and a full and open process with formal notifications to all affected by this proposal be reinstated.

Thank you.

Respectfully,

Dan R. Dinning, Chairman, dated: 7/7/17
Boundary County Board of Commissioners

Marc Eberlein, Chairman, dated:
Kootenai County Board of Commissioners

Glen Bailey, Chairman, dated: 7/12/17
Bonner County Board of Commissioners

Jack Buell, Chairman, dated:
Benewah County Board of Commissioners

Patrick "Mike" Fitzgerald, Chairman, dated:
Shoshone County Board of Commissioners

cc: Glen Nenema, Kalispel Tribal Chair, Ryan Zinke
United States Secretary of the Interior
EPA Region 10 Acting Regional Administrator Michelle Pirzadeh

Teri Johnston

Subject: Kalispel Tribe Letter

Gentlemen:

Attached is the letter that action will need to be taken on next week for you to agendize. Boundary County will sign it first, then we will start emailing scanned copies to each county to return to us so we can forward it on with signatures (in color) to others. The concern of this is that outside of the preservation boundary there exists an impact area that should a development occur within it, it may necessitate an analysis as to whether or not it will affect the air quality over the reservation. Of greatest concern to me is that neither the Kalispel Tribe nor EPA thought enough considered it necessary to notify counties that may be impacted by this designation.

Hopefully you can agendize and Michelle will coordinate the signing and emails on Monday and Tuesday.

Thank you.

Dan Dinning
