

Cheryle Murphy

I have read the information about the PacWest Silicon Smelter. My family will be moving the moment it is approved. I have asthma and can't stay because of the air pollution this smelter produces and warns about. Others will leave: people worried about property values dropping, parents of school age children worried about their child's health, and those just wanting to breath healthy air.

This Smelter might bring in jobs, but we will loose more local jobs as businesses shut their doors due to lack of customers. No longer the sweet supportive community we have today.
