

Branka Vukic

My husband and I got property In Oldtown 4 years ago because we fell in love with the nature that Idaho has to offer especially Pend Oreille River. The land that we purchased was supposed to be our retirement spot but we didn't wanna wait and proceeded of building a cabin so we can enjoy it on our weekends off. Where we are located would be right across the river from the smelter and I just can't see my self in 30 years sitting on my porch and looking at the smelter. I'm all for making money and boosting the economy but not this way, this is wrong. Smelter has no place in the nature, among family's and neighborhoods, clean waters and fresh air. Please don't build it, please don't pollute us!!
