

Phyllis J. Kardos

PacWest proposes to build a spur line to the proposed Newport silicon metals smelter to haul in the raw materials and take out the silicone and byproducts.

2. How much rural land will be required to construct the spur line?
3. What will be the amount of forestland loss in the building and operation of the spur line?
4. What will be the acreage of pastureland lost in the building and operation of the spur line?
5. How many acres of animal habitation will be lost through the construction and operation of the spur line?
6. What wetlands will be impacted by the construction and operation of the spur line?
7. How will the rural landscape be impacted by the construction and operation of the spur line?
8. Who will be fiscally responsible for the maintenance and safety upkeep of the spur line?
