

Megan Alger

Please give this a second thought. If you ddont want diesels being deleted and being worried of there emmissons why are you approving a smelter? Because of money? Because money always wins? Please. I have two kids whom love outside, swimming, hiking ,wildlife. It's why we live where we do. I don't want there life being impacted because of this choice. We don't live in Washington,we don't want to be impacted by there decisions,which we would. They would use all our roads ,railroads, water that runs into our lake . We need a say and we say no.
