

Sharon Burke

I am writing in support of adopting the Advanced Clean Truck Act to fight climate change and air pollution. We must make the transition to zero emission vehicles as soon as possible. There will be no point in the future that making this transition will be easier or cheaper. If we want to avoid climate catastrophe: extreme drought, bigger wildfires, rising sea levels, ocean acidification, toxic air and waterways, mass extinctions of wildlife, forests and plant life, we must take brave and bold action to reduce greenhouse gas emissions now. Thank you.
