

Seth LaRiviere

Comments I made during webinar:

Existing Units:

Notice to all residents what is an ozone depleting/ GWP product and how to dispose

Can take to waste mobile/ xfer station free of charge

Free P/U w/ garbage or maybe twice annual

Free service to recover- paid with recycling of gas

Model after 411 call b4 dig for disposal of condensing units/ refer containing systems.

More enforcement of venting/ refer tracking (EPA isn't doing it)

Proof of leak check before selling automotive refer

Required proof of proper operation/ leak free

New units:

Surcharge

Tracking

Cradle to grave tracking by serial number

Proof of evacuation / pressure test (California)

Other:

Notice/ training to all HVAC shops on proper handling

HVAC refer card from Washington (608ish)

Cap & Trade/ Carbon tax credit for reclaimers who take in dirty refrigerant that must be destroyed.

They can sell credit to offset cost
