

Public Utility District No. 1 of Chelan County

Chelan County PUD's spreadsheet "WA Utility LCFS Credit Calculator 3-30-22.xlsx", that was presented and discussed with the Department of Ecology and electric utilities at their meeting that was held at 3 PM on March 31, 2022, has been emailed to Debebe Dererie at debebe.dererie@ecy.wa.gov. This methodology is in harmony with the methods for credit generation used by other states that have clean fuels program compliance requirements. It uses objective and verifiable data from the US EPA vehicle fuel economy database, Washington Department of Licensing vehicle registration, utility fuel mix disclosure and utility service territory zip codes and county data to measure greenhouse gas emissions associated with electricity consumed by light duty electric vehicles specific to each electric utility participating in the clean fuels program. The spreadsheet still needs final electric utility service territory zip code data to be complete.
