

DAVE JAENICKE

What about JBLM military base? This installation just disposed of thousands upon thousands of TON'S.."logging debris piles" by open burning. 11/2021 No notice to civilian adjoining farm property owners. No Dept. Of Ecology or any accountability at all. None. Chinook helicopters belching black smoke and you can see and smell the emissions. Polluting our water wells and giving our families and our livestock cancer. Didn't see mention in this document. In fact ..we view this document to be a waste of time and taxpayer waste. The "summer winds" will carry the burned cancer causing particulates all over the Spanaway/ Roy, Wa area. I see it all over my truck. We would propose an amendment that "ALL OPEN BURNING OF LOGGING DEBRIS GENERATED IN THIS STATE BE PROHIBITED!" Non existent accountability for climate change is a lot of hypocrisy and we see it daily. Secondly ..the Graham Kapowsin Landfill. Now ..here is another example of our farm being exposed to smelling this "Mount Trashmore" and they have already polluted area creeks and streams. Methane Mountain and your all UNRESPONSIVE! AND UNACCOUNTABLE.
