

## Robert Soltess

My foremost concern is that the CCA rules must maintain the integrity of the cap. The ultimate goal of this law is to achieve our greenhouse gas limits and improve air quality, especially in overburdened communities. Ensuring that emissions do not exceed the cap is critical. When designing program details, maintaining the cap should be one of the primary goals. We must get moving in this critically important work. Thank you for your hard work in making this a reality and helping Washington to lead the nation.
