

Jacob Baughman

Thank you. My name's Jacob Baughman, J-A-C-O-B B-A-U-G-H-M-A-N. Uh, and I just have some brief comments to make. Uh, the current wording of the proposed rule dictates that non-utility-owned natural gas facilities are not automatically eligible for no-cost allowances under the CCA. Uh, this creates an unfair, non-equal treatment of generating facilities, and also have the knock-on effective increasing cost for consumers, and also likely increasing environmental emissions down the road. Our proposed that final rule treat all facilities equally with regard to the no cost-- no-no cost allowances. Thank you.
