I support the new cap-and-invest rule needed to implement the Climate Commitment Act.

We are facing an extreme climate crisis and must start making changes before it's too late. The best climate policy — environmentally and economically — limits emissions and puts a price on them. Cap and invest is one way to do both and it also encourages aggressive climate change goals. We need a path to meet the greenhouse gas emission limits set in state law and this rule supports new investments in climate resiliency programs, clean transportation, and address health disparities across the state. It's time for us to take these BOLD climate actions -- please ACT NOW!
