THIS EMAIL ORIGINATED FROM OUTSIDE THE WASHINGTON STATE EMAIL SYSTEM

- Take caution not to open attachments or links unless you know the sender AND were expecting the attachment or the link I don't believe you could provide a coherent explanation of how cap and trade benefits anyone. Anyone with a science or engineering background would grind you up and spit you out, exposed as a fraud, parroting party-line mumbo jumbo that you think will "help the environment." It's all bullshit and I would think you of all people would recognize that when you see it. Stop the insanity. End any further discussion of cap and trade before you permanently destroy the economy. I know that's what the governor wants, but now you know that we know that - so it's time to grow a spine and send that bastard to hell where he belongs. You don't represent the governor or the people who own the governor. You represent the people who are leaving Washington for anywhere else as fast as they can. Thank you for the opportunity to comment on rulemaking for Washington's new cap-and-trade program. I urge you to reject this bullshit policy to help minimize the impacts on Washington families, small businesses and working people across our state. All cap and trade does is move money around. You could do something right now to actually "help the environment" but all this does is move money into your account. Please do everything you can to reduce the costs of this new program to minimize burdens on Washington families and working people across our state. Thank you. Sincerely, David DeFord deforddk@msn.com 14613 Three Lakes Rd, Snohomish, WA 98290, USA
