

## Melinda Holman

I support the new cap-and-invest rule needed to implement the Climate Commitment Act. We are facing a climate crisis and must start making changes. We **MUST** do this for our future generations. The Climate Commitment Act includes provisions to promote environmental justice and equity. The best climate policy — environmentally and economically — limits emissions and puts a price on them. Cap and invest is one way to do both. Cap and invest encourages aggressive climate change goals. This rule supports new investments in climate resiliency programs, clean transportation, and address health disparities across the state.
