Look we already pay enough in gas prices and not only having one of the highest gas taxes in the US. I'm so tired of our voices not being heard! This state already takes enough money from the hard working blue collar people and now they want more money? Unless the state is going to personally buy me and my family an electric car and pay for the outlet to get put in my house, sure go ahead. But I don't see that happening. There are a ton of people who are gear heads and what will happen now? They can't have a hobby? Just like the whole magazine ban. All of this is getting old. Let's us have our rights, let us be heard, and we need people to stand up for us middle class blue collar workers who work hard everyday for this state to just take almost 1/3rd of our checks. Thank you for the opportunity to comment on rulemaking for Washington's new cap-and-trade program. I urge you to adjust this costly new policy to help minimize the impacts on Washington families, small businesses and working people across our state. Studies estimate that this program could increase the cost to manufacture gasoline and diesel fuels by as much as 47 cents per gallon in 2023. (Cap and Trade Program Analysis, Washington Research Council, Memo on E2SSB 5126, June 6, 2022.) This is on top of record high fuel prices that consumers are already paying at the pump! Washingtonians are burdened enough right now with skyrocketing inflation and an economy that is still suffering the consequences of the COVID-19 pandemic. Gas prices in Washington state are already some of the highest in the nation. Please consider delaying the inclusion of gasoline and diesel fuel for at least the first few years – as California's program did in order to delay the impacts on consumer fuels. Many experts believe the goals set by this program are too unrealistic. In order to meet its goals the program relies on a total ban of new gas, diesel and hybrid vehicles by 2035 – starting in 2026 with a requirement that 35% of new vehicles sold in Washington must be electric vehicles. Surveys show that a majority of Washington voters believe the state legislature needs to go back to the drawing board and revise the Cap-and-Trade program to make sure it will work as intended without placing such enormous cost burdens on Washington families and businesses. When it was first introduced, the state originally estimated that the Cap-and-Trade program would cost up to \$500 million per year – which the state would spend on a variety of climate-related programs. Recent estimates indicate that the program could now cost up to 4 times more – close to \$2 billion a year. (OFM Fiscal Note 2021, Ecology Preliminary Analysis, May 2022) Please do everything you can to reduce the costs of this new program to minimize burdens on Washington families and working people across our state. Thank you. Sincerely, Zach Hastings
