

Marilyn Darilek

I've been a resident in Spokane County since 1978, having moved from Fresno, CA. The weather and air quality has diminished significantly here in that time. I support the CCA for reductions in climate pollution, improved air quality, investments in clean transportation, clean energy, and community justice for overburdened communities. The CCA proposed rule must:

- *Maintain the integrity of the cap to achieve greenhouse gas limits and improve air quality
- *Prioritize significant improvements in BIPOC communities
- *Collaborate with the Environmental Justice (EJ) Council and communities to provide clarity on how the Council and communities will engage in development and implementation of the program

Thank you for considering these issues and for your service to a healthier environment for all.
