Dear WA Department of Ecology,

Thank you for the opportunity to comment on Washington's Clean Fuel Standard. I am very supportive of the draft Clean Fuel Standard and applaud the Department of Ecology for setting our/clean fuels trajectory to be the strongest possible per the law.

As a person of faith, addressing our transportation pollution to co-create a more just and sustainable future is an important part of my call to live more lightly on Earth so that all may thrive.

please pay attention to the science report the IPCC has been sssssssssssreaming about for decades. Climate change is here and we are responsible for the demise of the planet. IF your doctor tells you cancer is a 100% consequence from smoking you'd quit. Why aren't you following the warnings of the IPCC? It's the same simple cause and effect deduction.

We are living in the most consequential time period of the history of our planet. Why? IT took 55 million years of evolution to create the world since the last dinosaur wipe out and 250 years of fossil fuel use to destroy it. IF your not throwing up after that sinks in your not qualified to be a employee for the Dept of Ecology.

Time is of the essence with our response to the climate crisis. Ambitious implementation of this law is critical for a just transition to clean energy that addresses our moral obligation to heal our climate and communities. Please ensure that the final rule maintains the strong carbon intensity standards of a 20% reduction by 2034.

In addition to the urgent need to reduce transportation pollution, I believe/how/we respond to the climate crisis is also a moral issue. It is imperative that utilities are held accountable to thoughtful and equitable reinvestments that further transportation electrification and reduce pollution in overburdened communities◆ as required by the law./

I have faith that Washington can and will meet our greenhouse gas reduction goals through our gifts of innovation and dedication to stewardship. Thank you for putting us on that path and demonstrating our state's commitment to a clean energy future by implementing the strongest possible Clean Fuel Standard.

Sincerely,  
Mrs. Abbie Carrasco
